

QA Work Report — Aman Kumar

Wilyer Private Limited · ClickUp CMS space · Period: **7 Aug 2025 – 23 Jul 2026** · Generated 23 Jul 2026 from the ClickUp API

1,724 WORKSPACE TASKS (ALL CREATORS)	948 REPORTED BY AMAN (55%)	608 SHIPPED / DONE (64%)	106 IN PROGRESS	234 BACKLOG / OTHER
--	---	---------------------------------------	---------------------------	----------------------------------

Summary

Between 7 Aug 2025 and 23 Jul 2026 the CMS workspace logged **1,724 tasks** in total (all creators, including subtasks). Of these, **948 (55%) were reported by Aman Kumar** — bugs, improvements and feature issues across 37 ClickUp lists, covering the CMS POC Sample platform (cmspocsample), CMS Live (Wilyer Signage), the RBAC / Group-in-Group and folder-system initiative, widgets, and the Android, LG webOS, Samsung Tizen, BrightSign/Raspberry Pi, Windows and On-Premise player platforms. Of Aman's 948: **608 are shipped or done**, 106 are actively in progress, and 234 remain in backlog. All per-area and monthly figures below cover Aman's 948 tasks.

Workspace tasks by reporter (1,724 total)

REPORTER	TASKS	SHARE
Aman Kumar	947	55%
Wilyer Admin	504	29%
Sameer Vashisth	243	14%
Others (4 people)	30	2%

- **55% of everything the team logged came from Aman** — nearly double the next reporter.
- **CMS POC Sample:** 171 of 174 reported issues shipped (98% resolution) — playlists, folders, groups, clusters and screens.
- **RBAC / Group-in-Group:** largest 2026 initiative — 210 tasks incl. 54 merge bugs, 93% shipped.
- **Busiest months:** Jul 2026 (179) and Apr 2026 (154), driven by the RBAC merge sweep and POC Sample regression testing.
- **Open risk:** LG/Samsung (25 of 26) and On-Premise (9 of 10) reports remain in backlog.

- 2025-12-26 · Sub-user role is not displayed in Hierarchy View — [shipped](#) (86d1cuh3h)
- 2025-12-26 · Unauthorized error shown in Playlist History when sub-user assigns a playlist — [shipped](#) (86d1cuvdx)
- 2025-12-26 · When a sub-user click on the Duplicate Playlist option is not displayed in sub user it is display only admin — [shipped](#) (86d1cv61b)
- 2025-12-29 · Playlist Mode and Manage Playlist feature not working under Cluster — [shipped](#) (86d1db0xb)
- 2025-12-29 · Error occurs while publishing Media Set as a new playlist — [shipped](#) (86d1db366)
- 2026-01-02 · When a user creates a duplicate group, the system automatically creates all levels of hierarchy folders under the Library. This behavior is unexpected and results in unnecessary folder duplication. — [shipped](#) (86d1eez44)
- 2026-01-19 · Owner option should not be displayed for Sub-user role under New Member — [shipped](#) (86d1mwdzb)
- 2026-01-21 · Assigned playlists are not displayed for Sub-user — [shipped](#) (86d1nqx32)
- 2026-01-22 · Notification > Email Notification Disabled but Options Active — [shipped](#) (86d1p5bby)
- 2026-01-22 · No Validation for Empty Notification Selection — [shipped](#) (86d1p5n0j)
- 2026-01-22 · Notification Settings > Some fields are blank in the received Excel report (Pincode, Assigned Content, Used Storage, MAC) — [shipped](#) (86d1p9bcg)
- 2026-01-27 · The system allows the same screen to be selected/assigned to both Parent and Child groups, but the screen is added successfully — [shipped](#) (86d1qjn93)
- 2026-01-27 · The system should not allow duplicate group names under the same parent and must display a proper validation message. — [shipped](#) (86d1qjw9w)
- 2026-01-27 · User role/permission changes not reflected with out hard refreshing — [not needed to do](#) (86d1qk0mf)
- 2026-01-27 · Blank Page Displayed When Clicking on Cluster Tab After Publishing from Library — [shipped](#) (86d1qkmza)
- 2026-01-27 · The file is unpublished from File Details, but it still appears as published in the Library. — [shipped](#) (86d1qkyfh)
- 2026-01-27 · Create Permission Appears Enabled in UI Even When Not Assigned — [shipped](#) (86d1qnhnc)
- 2026-01-27 · When a user creates a subfolder inside a parent folder, the newly created subfolder does not appear automatically in the folder list. — [shipped](#) (86d1qpvtz)
- 2026-01-27 · Rename functionality is not working in Folder Library — [shipped](#) (86d1qpx5a)
- 2026-01-27 · When a user deletes a nested (child) folder that is not linked to any group, the folder gets deleted but the media files inside the folder are not moved to the root folder as expected — [shipped](#) (86d1qrhcq)
- 2026-01-30 · When a sub-user plays Library media , and later the same media is played by the Admin on another screen, the sub-user’s Playback Report, Delivery Report, and Target Screen list incorrectly show the Admin-played screen. Reports are generated based on parent-child hierarchy instead of being limited to the sub-user’s own screens, causing incorrect data visibility. — [shipped](#) (86d1t332x)
- 2026-01-30 · When a sub-user plays a playlist and later the same playlist is played by the Admin on another screen, the sub-user’s screen count incorrectly includes the Admin-played screen instead of showing only the sub-user’s assigned screens. — [shipped](#) (86d1t3ycd)
- 2026-01-30 · When a playlist is published from the Admin account, it is successfully published to the sub-user’s screen, but the playlist should not be editable from the sub-user account — [shipped](#) (86d1t46yu)
- 2026-01-30 · When a sub-user plays a playlist and later the same playlist is played by the Admin on a different screen, the Playlist History for the sub-user incorrectly includes the Admin’s screen instead of showing only the screens assigned to that sub-user. — [shipped](#) (86d1t4vm5)
- 2026-01-30 · Screen ID and Screen Name are not displayed under Bulk Action → Groups for the Admin user and sub user. — [shipped](#) (86d1t4yce)
- 2026-02-04 · Dashboard API fails with QUIC protocol error causing JS crash — [shipped](#) (86d1ux8a8)
- 2026-02-09 · Email ID and User Name are not displayed in logs under the Team module. — [shipped](#) (86d1x070q)
- 2026-02-13 · Media and Widgets records should be filtered by folder while publishing for sub user — [shipped](#) (86d1yvv5w)

- 2026-02-13 · Duplicate cluster name is allowed while editing an existing cluster — [shipped](#) (86d1ywygr)
- 2026-02-13 · Duplicate batch name should not be allowed within the same cluster during create and update — [shipped](#) (86d1ywmgf)
- 2026-02-13 · Cluster record is not displayed after publishing playlist for cluster — [shipped](#) (86d1yx915)
- 2026-02-16 · Sub User – Export Logs report should be display after downloading report under Account Settings — [shipped](#) (86d1zqcn7)

RBAC / Group-in-Group & folder system — 210 tasks

2026 Sprints → RBAC / Group in Group (156)

- 2025-08-19 · When an admin changes a role, the updated role is not reflected automatically for the role-based user. — [shipped](#) (86d01bdu4)
- 2025-08-19 · The folder is not searchable. — [backlog](#) (86d01c3ed)
- 2025-08-25 · When a user assigns a playlist to a screen, the assigned playlist is displayed in the first position under Assigned Playlists. — [shipped](#) (86d035wp5)
- 2025-10-01 · When a user clicks on the Email tab and then clicks on Design tab, an error message is displayed. — [shipped](#) (86d0fww1h)
- 2025-10-01 · When a user clicks on the tabs shown in the screenshot, the system displays the following error message: "www.postermywall.com refused to connect" — [shipped](#) (86d0fx55d)
- 2025-12-09 · When a user edits an existing role and navigates away without clicking Save, the system automatically saves the changes. This is incorrect behavior — the system should only save after the user clicks Save. — [shipped](#) (86d17hg8m)
- 2026-01-02 · Assigned media not displayed under Assigned Playlist after playlist schedule runs — [shipped](#) (86d1ehfnq)
- 2026-01-22 · When editing a Child role, it cannot report to its Parent, resulting in an incorrect role hierarchy being displayed. — [shipped](#) (86d1p9g7j)

QA Bugs List → UI/UX and Workflow improvements (24)

- 2025-10-15 · When a user sets a schedule under Sequences (for example, defining start and end times for sequence playback) and clicks the "Apply Schedule" button, the page becomes blank for new sequences. — **shipped** (86d0mhf2a)
- 2025-10-15 · When the user schedules multiple media files for the same time under Sequences, only the first scheduled media plays, and the second media does not play. — **in development** (86d0mnpdp)
- 2025-10-28 · Live Designing Canvas App-integrate a live design canvas within the CMS for direct visual content editing — **shipped** (86d0rkucy)

- 2025-10-28 · Email Notifications for License Expiry- Send automated email alerts to users starting 10 days before screen licenses expire. — **backlog** (86d0rkvqh)
- 2025-10-28 · Screen Off Schedule – Remove redundant options (“Turn off hardware” and “Do not take any action”) from the section — **shipped** (86d0rkx5q)
- 2025-10-28 · Playlist Creation on Canvas – Correct the display error showing “+0” when only one file remains in sequence. — **shipped** (86d0rkx8z)
- 2025-10-28 · Screens Section UI – Replace the “settings” icon under “Action” column with a “View” button for clarity. — **shipped** (86d0rkxbf)
- 2025-10-28 · Library Direct File Publishing – The scheduling feature is non-functional and the workflow unstable; requires full testing and development. — **backlog** (86d0rkxgz)
- 2025-10-28 · Screen Settings (UX Issue) – The “Configuration” button is positioned too low, forcing excessive scrolling. Needs repositioning for better usability. — **shipped** (86d0rkxkh)
- 2025-10-28 · Zone Settings – Fix transition behavior where setting a transition in one zone affects another zone — **shipped** (86d0rkxrw)
- 2025-10-28 · Playlist Preview – Clients are experiencing playback delays during preview; requires testing and optimization. — **backlog** (86d0rkxvz)
- 2025-10-28 · Scheduling Issue – The scheduling feature fails when dates are selected with durations exceeding 12 hours. Needs urgent debugging and QA validation. — **shipped** (86d0rky0e)
- 2025-10-28 · License Request Function – Currently unused as partners are not responding. Review functionality and consider disabling or redesigning this feature. — **shipped** (86d0rky43)
- 2025-10-28 · CMS ID showed on screen — **backlog** (86d0rkza3)
- 2025-10-30 · Error: "layouts[0].zones[0].schedule[0].config.startDate" must be a valid date when publishing without schedule time/date — **in development** (86d0te588)
- 2025-10-30 · Different scheduling times can be set for Zone 1 and Zone 2 — schedules not synchronized — **backlog** (86d0tea98)
- 2025-10-30 · Empty playlist is created even after showing an error message — **shipped** (86d0ten35)
- 2025-10-30 · “+0” display appears after showing error message “You cannot add repeatable sequence” — **in development** (86d0tfx4p)
- 2025-11-07 · When the user creates a playlist with sequences and applies time scheduling, clicking Publish to screen results in a 500 server error instead of publishing successfully. — **shipped** (86d0wfk3w)
- 2025-11-13 · Previously scheduled sequence continues to play when the next sequence is scheduled (time overlap — sequence not replaced) — **backlog** (86d0yh85r)
- 2025-11-13 · When the user unchecks “Routine Daily,” the scheduled days are not cleared automatically — **in development** (86d0yhnf5)
- 2025-12-01 · Screenshot feature requires disabling Live Data View before taking screenshot — should take screenshot directly when user clicks Get Screenshot — **backlog** (86d14uc4v)
- 2025-12-01 · Clicking on Schedule Icon opens a blank page instead of Schedule settings — **shipped** (86d14v3rp)
- 2025-12-04 · when user offline screen task bar due to kiosk mode setting is on — **backlog** (86d168xm1)

QA Bugs List → Functional and Integration Enhancements (13)

- 2025-10-28 · YouTube Widget – Currently not working properly; requires debugging and stability fixes. — **backlog** (86d0rm0py)
- 2025-10-28 · Power BI Widget – The Development team must provide a detailed compatibility sheet and a list of required hardware specifications. — **backlog** (86d0rm0r8)
- 2025-10-28 · NTP Sync Issue – When internet connectivity is lost, the NTP sync displays a blank screen. A fallback mechanism or error message should be implemented to allow content playback in non-sync mode. — **backlog** (86d0rm0uk)
- 2025-10-28 · Microsoft Account Integration – Enable login using Microsoft accounts to fetch user credentials and emails. — **backlog** (86d0rm0z3)
- 2025-10-28 · Google Login & Signup – Add Google authentication for the CMS dashboard. — **backlog** (86d0rm152)
- 2025-10-28 · Media File Compression – Implement automatic resolution adjustment or compression on the hardware side, as display resolutions differ from uploaded content. — **backlog** (86d0rm1b7)

- 2025-10-28 · CCTV Widget – Develop a widget to broadcast live CCTV feeds or use an HDMI input as content. — **backlog** (86d0rm1d3)
- 2025-10-28 · Stocks & Currency Rate Widgets – Introduce live financial widgets to display stock updates and currency exchange rates. — **backlog** (86d0rm1f7)
- 2025-10-28 · LG & Samsung Devices (Commercial and Hospitality) – Conduct compatibility checks and ensure support for the latest models. — **backlog** (86d0rm25w)
- 2025-10-28 · LG & Samsung Consumer TVs – Verify and extend compatibility for consumer-grade displays. — **backlog** (86d0rm2fk)
- 2025-10-28 · Wisdom TV Client – Provide an updated app version compatible with the latest CMS. — **backlog** (86d0rm2mc)
- 2025-10-28 · Fire TV Clients – Update app version for compatibility and improved performance. — **backlog** (86d0rm2p2)
- 2025-10-28 · Number, Email, Date, Phone number, In Partner Page Duplicate Number. — **in review** (86d0rm2z8)

- 2026-06-02 · New Signup Email Notification for White-Labeled Domains — **scoping** (86d374da4)
- 2026-07-02 · Logs are deleted when an account is deleted, resulting in a loss of historical records — **in development** (86d3j4295)
- 2026-07-02 · OTA update shows as completed but remains the old version in the queue (e.g., item 109) — **in development** (86d3j42e1)
- 2026-07-02 · Discrepancy in playlist file count: a single playlist on two screens shows different file counts (two vs. one) — **backlog** (86d3j42f3)
- 2026-07-02 · The rotation filter is not functioning as expected — **backlog** (86d3j42gf)
- 2026-07-02 · YouTube playback issues: left-click exits the app on X98 (4/32) and the cursor disappears — **pending design** (86d3j42jt)
- 2026-07-02 · Restart device function is failing on all rooted devices — **backlog** (86d3j42m2)
- 2026-07-02 · PDF preview does not match the actual output on the screen — **shipped** (86d3j42nj)
- 2026-07-02 · News widgets (Zee News, India Today) are not functioning — **backlog** (86d3j42p8)
- 2026-07-02 · AQI Meter data is incorrect; needs font family alignment and source attribution — **backlog** (86d3j42q2)
- 2026-07-02 · Android players display only one indicator instead of the usual three — **shipped** (86d3j42qh)
- 2026-07-02 · In Sequence, repeating files can be inserted beyond the total media file count — **in development** (86d3j42rk)
- 2026-07-02 · Scheduling overlap error: system should notify users when schedules conflict — **scoping** (86d3j42tk)
- 2026-07-02 · Weather Widget: City preview fails to load upon addition, and there is no option to clear the selected city — **in development** (86d3j42u8)
- 2026-07-02 · Back Button disappears when click on any Setting in Bulk action — **shipped** (86d3j42v6)
- 2026-07-02 · Improvements — **backlog** (86d3j45yg)
- 2026-07-02 · Allow adding folders directly to a sequence instead of individual files — **scoping** (86d3j46au)
- 2026-07-02 · Notify partners automatically when a new client signs up under their account — **in development** (86d3j46db)
- 2026-07-02 · Enable "Clear Cache" functionality across multiple screens simultaneously — **in development** (86d3j46h5)
- 2026-07-02 · Improve live data accuracy for widgets — **in development** (86d3j46pf)
- 2026-07-02 · Enhance Folder search UI within the library — **in development** (86d3j46ug)
- 2026-07-02 · Highlight the "Close" button in the library for better visibility — **in development** (86d3j46wu)
- 2026-07-02 · MS Office integration for widgets — **scoping** (86d3j46zp)
- 2026-07-02 · Optimize hardware detail fetching time (currently takes ~30 minutes) — **scoping** (86d3j470c)
- 2026-07-02 · Improve navigation logic: exiting a playlist should return to the screen view, not the playlist section — **in development** (86d3j471f)
- 2026-07-02 · Dashboard map: show real-time screen locations instead of the default India map — **in development** (86d3j472j)
- 2026-07-02 · Improve schedule routine selection: selecting "Daily" should automatically check all days — **in development** (86d3j474c)
- 2026-07-02 · Standardize back button placement in folders to match Playlist and "What's New" sections — **in development** (86d3j475x)
- 2026-07-02 · Highlight Posterwall integration and add premium feature "crown" icons — **scoping** (86d3j476u)
- 2026-07-02 · Improve Feedback section with photo upload capabilities — **scoping** (86d3j477v)
- 2026-07-02 · Add a toggle button in screen settings to turn the screen on/off — **scoping** (86d3j478q)

- 2026-07-02 · Add photo support for Birthday widgets — **scoping** (86d3j47a7)

2026 Sprint features — 87 tasks

2026 Sprints → Media Sets (19)

- 2026-07-08 · Media Set Name Field Accepts Unlimited Characters Without Validation — **shipped** (86d3mqta4)
- 2026-07-08 · Media Set Description Not Displayed on Card After Creation — **shipped** (86d3mqv4m)
- 2026-07-09 · Media Sets: List view — unlabeled action icons + two 'No files' empty sets — **shipped** (86d3mzwaz)
- 2026-07-09 · Media Sets: Error toast bottom-left while Name field at top gets no inline error — **shipped** (86d3mzwbd)
- 2026-07-09 · Media Sets: Header labels overprinting at 1024px — **in development** (86d3mzwc6)
- 2026-07-09 · Media Sets: 'ActiveChange ratio' run together at 1440px — **in development** (86d3mzwe0)
- 2026-07-09 · Improve Button Placement for Better Visibility and User Experience — **shipped** (86d3n05d0)
- 2026-07-09 · Breadcrumb Navigation Missing Inside Folder — **shipped** (86d3n3dkj)
- 2026-07-09 · Change Aspect Ratio Modal Should Include Fixed "Cancel" and "Apply" Action Buttons — **shipped** (86d3n3p9j)
- 2026-07-09 · [CMS] Media Set create → HTTP 500 on malformed folderId (uncaught CastError) — **shipped** (86d3n51bv)
- 2026-07-10 · Media Set records are not displayed despite having Folder Access permissions for Sub User — **shipped** (86d3nbyhp)
- 2026-07-10 · Total media file count should be displayed for each Media Set based on folder — **in development** (86d3nd5p2)
- 2026-07-10 · Bug 1: Media Sets Search Interprets Search Input as Regular Expression — **shipped** (86d3nhcr4)
- 2026-07-10 · Bug 2: Editing Media Set Name Above Character Limit Fails Silently — **shipped** (86d3nhcr7)
- 2026-07-13 · Incorrect Media Display After Refresh in Library Folder — **shipped** (86d3p1kcm)

- 2026-07-15 · Unused Duration Field Is Displayed in Prayer Schedule — **shipped** (86d3q1cwf)
- 2026-07-16 · Prayer Schedule allows Active plans without location, causing 400 API error and missing prayer timings — **shipped** (86d3q9zmc)
- 2026-07-16 · Today page does not display a user-friendly error when Prayer Schedule location is missing — **shipped** (86d3q9zmg)
- 2026-07-16 · Calendar displays Riyadh prayer timings for Prayer Schedules with no configured location — **shipped** (86d3q9zmn)
- 2026-07-16 · "Publish" Action Label Is Unclear and Does Not Indicate Screen Publishing — **shipped** (86d3qac1a)
- 2026-07-16 · Screen Card Click Does Not Redirect to Screen Configuration Page — **shipped** (86d3qakxg)
- 2026-07-16 · Unable to Close Popup After Saving Without Any Changes — **shipped** (86d3qbp5k)
- 2026-07-16 · Missing "Prayer Schedule" Tab Under Media to Display All Created Prayer Schedules — **shipped** (86d3qbwqm)
- 2026-07-16 · Prayer Schedule Calendar Sends Multiple API Requests on Repeated Apply Clicks — **shipped** (86d3qbxx1)
- 2026-07-16 · Screen Displays "Online" Status Instead of "Idle" When Device Is Idle — **shipped** (86d3qc1q7)

- 2026-07-16 · Folder Tab Missing Under Prayer Schedule in Media & Widgets — **done** (86d3qcwk0)
- 2026-07-21 · The created Prayer Schedule is not displayed under the Folder section. Users cannot access or manage Prayer Schedule media from the Folder view. — **backlog** (86d3rrjua)
- 2026-07-21 · Unable to Add Multiple Media Types (Image + Video) to Prayer Schedule Pre-Announcement and Banner — **scoping** (86d3ruhzu)
- 2026-07-23 · Prayer Schedule: No upper bound on Banner / Pre-Announcement duration — **scoping** (86d3thr6h)
- 2026-07-23 · Prayer Schedule: Add-New-Plan leaves Start/End dates blank (UX inconsistency) — **scoping** (86d3thr6k)
- 2026-07-23 · When a user selects a specific month and date using the Calendar filter, the API does not return records corresponding to the selected calendar month. Instead, it returns records from a current month, resulting in incorrect data being displayed. — **backlog** (86d3tjf50)

2026 Sprints → Rollout (21)

- 2026-04-28 · Media Set allows duplicate names without validation due to edit media sets — **shipped** (86d2u9r53)
- 2026-04-29 · No horizontal scroll bar should be visible — **shipped** (86d2uhc8d)
- 2026-04-29 · "New Rollout" Button should not be Visible After Invalid Search Input — **shipped** (86d2uhdzt)
- 2026-04-29 · Pagination Missing on Content Rollout Page — **shipped** (86d2uhkfd)
- 2026-04-29 · Incorrect Button Label — "New" button Should Be "Create Media Set" — **shipped** (86d2uhxch)
- 2026-04-29 · Total Record Count Not Updated After Creating Media Set — **shipped** (86d2uhz7e)
- 2026-04-29 · Previous records not visible in Media Set view (only latest entries displayed) — **shipped** (86d2um2q0)
- 2026-04-29 · Pagination missing on Media Sets listing page — **shipped** (86d2um4ka)
- 2026-04-29 · Remove unnecessary red-highlighted placeholder in "Create Media Set" screen — **shipped** (86d2um6ym)
- 2026-04-29 · Choose group button should not be displayed after create new rollout — **shipped** (86d2un33b)
- 2026-04-29 · Assign Media to S5 – Not All Records Visible — **shipped** (86d2up235)
- 2026-04-29 · Assign Media to S5 – Search Bar Missing in Record Selection — **shipped** (86d2up315)
- 2026-04-29 · Duplicate Record Creation should not be Under Add Content — **shipped** (86d2up62r)
- 2026-04-29 · Duplicate Record Creation Should Not Be Allowed in Add Row — **shipped** (86d2up7mz)
- 2026-04-29 · Remove Placeholder Text Under Add Row — **shipped** (86d2up9q1)
- 2026-04-29 · Remove Placeholder Text Under Add Content — **shipped** (86d2upaph)
- 2026-04-30 · All assigned files should play in a continuous loop (one after another) on the selected screen. — **shipped** (86d2v1kmw)
- 2026-04-30 · Content Name Not Refreshed After Cancel or Close in Add Content — **shipped** (86d2v2qdd)
- 2026-04-30 · Row Code Not Refreshed After Cancel or Close in Add Row — **shipped** (86d2v2rhp)
- 2026-04-30 · Logs should be created for media sets and Rollout — **shipped** (86d2v3qtb)
- 2026-05-01 · The delete confirmation modal displayed while deleting a rollout is not consistent with the delete modal used in the Media Set module. This creates a mismatch in UI design and user experience across modules. — **shipped** (86d2vc1y4)

2026 Sprints → Reports (12)

- 2026-03-16 · Content Distribution chart does not follow Playback Count Date sequence — **shipped** (86d2agyp6)
- 2026-03-16 · Content Distribution chart not displaying Top 5 content correctly in Reports — **shipped** (86d2ah7fc)
- 2026-03-16 · Content names in the Top 10 Content chart are truncated with "...", making the full name not visible — **shipped** (86d2ahaye)
- 2026-03-16 · All Charts Should Be Displayed in Exported PDF — **shipped** (86d2ajk9t)
- 2026-03-16 · PDF Button Displayed as Charts Above pdf button — **shipped** (86d2ajx7w)
- 2026-03-16 · Header Alignment Issue in Exported PDF After Download — **shipped** (86d2ak5m4)
- 2026-03-16 · When the user applies the Top 5 filter on the Reports page, the legend colors do not match the stacked bar chart segments, making it difficult to identify — **shipped** (86d2akkh9)
- 2026-03-16 · When the user clicks on the Download button, the system downloads an XML file instead of the expected file format. — **shipped** (86d2amf85)
- 2026-03-17 · Change the design for playback report — **backlog** (86d2b1hd9)
- 2026-04-01 · Add to export pdf button in export grouped — **shipped** (86d2h04j5)

- 2026-04-02 · Screen Name, First Name, and Last Name Should be Displayed in Excel After Downloading Report — [shipped](#) (86d2h6c69)
- 2026-04-02 · Table Column Misalignment After Applying Content Item Metric Filters on Reports Page — [shipped](#) (86d2h6n25)

2026 Sprints → Direct File Publish (10)

- 2026-03-17 · Incorrect Status Tags Displayed for Scheduled Playlist (Upcoming/Active/Expired) — [shipped](#) (86d2azad0)
- 2026-03-17 · "View Schedules" Option Should be Redirect to Schedule Page — [shipped](#) (86d2azkvk)
- 2026-03-17 · Thumbnail image should be showed in direct playlist — [shipped](#) (86d2azyj2)
- 2026-03-17 · Newly Created Playlist Should be Displayed in Playlist Section — [shipped](#) (86d2b1ejn)
- 2026-03-17 · Direct Media Schedule File Should be Play on Screen — [shipped](#) (86d2b30mf)
- 2026-03-30 · Edit button is not working ,if is not required this button can be remove — [shipped](#) (86d2fmra9)
- 2026-04-01 · Alert Message Should not be Displayed when click on Library Section — [shipped](#) (86d2gpgnw)
- 2026-04-01 · Add Delete Button for Scheduled Playlists — [shipped](#) (86d2h0w6m)
- 2026-04-06 · Date Field Not Displayed in Excel After Downloading from Modern Sheets — [shipped](#) (86d2j5dvq)
- 2026-04-07 · Blank/Stuck Page After Performing Playlist Publish and remove Actions for windows exe — [shipped](#) (86d2jh1ab)

2026 Sprints → Screen Session Reports (2)

- 2026-03-05 · Session ID updates after power on/off cycle but creates incorrect session behavior — [backlog](#) (86d26n4u9)
- 2026-03-16 · Session Report Displays Previous Date When Device Is Powered Off and Turned On — [backlog](#) (86d2aj8he)

2026 Sprints → Webhook & Trigger (1)

- 2026-05-13 · Newly added keys should be visible and selectable in existing triggers in playlist — [backlog](#) (86d2zqznc)

Squad360 / QMS / MRMS — 79 tasks

QA Bugs List → 360 Squad (41)

- 2025-08-29 · Outlets — [backlog](#) (86d04vuk1)
- 2025-08-29 · Clicking "All" button twice removes records from table in Outlets page but Records should not disappear after repeated clicks — [testing](#) (86d04vv0d)
- 2025-08-29 · Numeric IDs are continuous across pagination in Outlets table — [backlog](#) (86d04vxve)
- 2025-08-29 · Numeric IDs in Outlets table cannot be filtered properly — [testing](#) (86d04w2wc)
- 2025-08-29 · Text alignment issue in dropdown menu options — [testing](#) (86d04wb8q)
- 2025-08-29 · Pagenation should be displayed same for screen and outlets — [backlog](#) (86d04wgf)
- 2025-08-29 · Filter is not working for Screen Count — [testing](#) (86d04wkw4)
- 2025-08-29 · Filter is not working for Screen Names — [testing](#) (86d04wnfm)
- 2025-08-29 · Filter applied should display for Photo Quantity — [testing](#) (86d04x00d)
- 2025-08-29 · All Outlets (Complete Export) button is not downloading csv file then show message "Failed to export data" — [testing](#) (86d04x9e7)
- 2025-08-29 · Clicking None button hides all columns and shows blank table instead of clear message — [testing](#) (86d04xhmt)
- 2025-08-29 · Screens — [backlog](#) (86d04xj3z)
- 2025-08-29 · Numeric IDs are continuous across pagination in Screens Data table — [backlog](#) (86d04xjj0)
- 2025-08-29 · Screens Record not showing correctly as per last 30 minutes user activity — [backlog](#) (86d04xrrk)
- 2025-09-01 · Screens Record not showing correctly as per last 1 hr user activity — [backlog](#) (86d05he0y)
- 2025-09-01 · Screens Record not showing correctly as per last 6 hr user activity — [backlog](#) (86d05hgcj)
- 2025-09-01 · Screens Record not showing correctly as per last 1-3 days user activity — [backlog](#) (86d05hke7)
- 2025-09-01 · Screens Record not showing correctly as per last 3+ days user activity — [backlog](#) (86d05hyav)

- 2025-09-01 · Both Store ID and SIM ID should be clearly visible in the text box without cutting or overlapping. — **backlog** (86d05jfyn)
- 2025-09-01 · "Deployed TV" field is showing blank for views — **backlog** (86d05k1vm)
- 2025-09-01 · Filter should be worked for last online and again clicking it is rest — **backlog** (86d05kp16)
- 2025-09-01 · Screen > Numbering ID is not showing in downloaded sheet — **backlog** (86d05kx0p)
- 2025-09-01 · When date range is auto-set, Clear Filter button does not display, If user manually enters date range, Clear Filter button appears. — **backlog** (86d05m8vx)
- 2025-09-01 · Uptime — **backlog** (86d05m8yq)
- 2025-09-01 · Performance Uptime Report is not matching, after downloading report from export sheet — **testing** (86d05nqh7)
- 2025-09-01 · Apply button alignment issue — appears at midpoint of text field — **backlog** (86d05nrz4)
- 2025-09-01 · When the user enters a City, District, or State name in the search box, no results are displayed. — **backlog** (86d05p7jd)
- 2025-09-01 · Numbering ID column is missing in downloaded Excel sheet — **backlog** (86d05pw7c)
- 2025-09-01 · Service Tickets — **backlog** (86d05pwmt)
- 2025-09-01 · When user clicks All button twice, action icons and table structure are displayed — **backlog** (86d05q1yn)
- 2025-09-01 · Services Visit — **backlog** (86d05qb9w)
- 2025-09-01 · Extra calendar icon is displayed on the Visits page — **backlog** (86d05qbmw)
- 2025-09-01 · Extra calendar icon is displayed on the Screen page — **backlog** (86d05qc1j)
- 2025-09-02 · "After clicking none button data is removed but table and icon is showing" — **backlog** (86d067qe9)
- 2025-09-02 · After Downloading sheet ,Data Misalignment in Service Visit Table View — **backlog** (86d067uae)
- 2025-09-02 · When clicking on the "+" action icon in the "Actions" column for some unresolved tickets, an error message is shown: "Service request not found for this screen" — **backlog** (86d067w9c)
- 2025-09-02 · Incorrect error message "No visit found for this screen" displayed despite visit data available — **backlog** (86d067xpi)
- 2025-09-02 · Visit ID, Visit Status, Visit Remark not showing & Serial Number column missing in downloaded sheet for screens — **backlog** (86d067zbh)
- 2025-09-02 · Visit details misaligned, Serial Number (#) is missing, and text shifted to wrong columns in downloaded sheet — **backlog** (86d0681m9)
- 2025-09-02 · Exported file data is incorrect and not matching visits count in Service Visit Management — **backlog** (86d0685hm)
- 2025-09-02 · When the user clicks on the Export button to download the Service Tickets data, the exported sheet does not match the data shown in the UI. — **backlog** (86d068kef)

QA Bugs List → QMS (23)

- 2026-05-18 · Popup alignment breaks after creating multiple services. The popup should remain properly aligned and responsive when additional services are added. — **completed** (86d31c7d0)
- 2026-05-18 · Blank page is displayed after creating a token, navigating to "Track Token," and then clicking the "Go Back" button. The previous page should load correctly instead of showing a blank screen. — **completed** (86d31cj0u)
- 2026-05-18 · Touch Scroll / Click Scroll Not Working Under Form Pages — **completed** (86d31cmpf)
- 2026-05-18 · Room create option is not available under the Counter module. — **review** (86d31e2nc)
- 2026-05-19 · Duplicate Counter Name Allowed After Edit — **completed** (86d31qgf1)
- 2026-05-19 · Case Sensitive Validation is Not Working in QMS — **completed** (86d31qmd8)
- 2026-05-19 · System should not allow duplicate form input field names and should display a validation message. — **completed** (86d31qtc8)
- 2026-05-19 · All records should be displayed and downloaded successfully in the Excel file without any error message. — **completed** (86d31tn41)
- 2026-05-19 · Deselected Input Fields Are Still Visible in Table Under Data Insights — **in progress** (86d31tuhw)
- 2026-05-19 · System allows performing custom actions on token and services without counter assignment. — **in progress** (86d31u1wu)

- 2026-05-19 · System should automatically assign a counter to the service after the user completes the screen registration form. — **in progress** (86d31u88d)
- 2026-05-19 · Duplicate and Case-Sensitive Space Names Are not Allowed under Spaces — **completed** (86d31ub1e)
- 2026-05-19 · Verify whether an inactive team member can access the application using existing active sessions without logging out but The inactive team member should be immediately logged out or denied access. — **completed** (86d31v7m2)
- 2026-05-19 · Sub User Created Space Under Parent Space Is Not Displayed — **in progress** (86d31vg21)
- 2026-05-19 · Sub user should be able to create services when "Manage Services" permission is enabled. — **completed** (86d31vnq8)
- 2026-05-19 · Permissions are not applied or checked properly according to the assigned user role. — **review** (86d31vxq8)
- 2026-06-18 · User is unable to create a new team member because the Create Team Member API request fails. — **not started** (86d3cyuc5)
- 2026-06-18 · No Maximum Length Enforcement on Space Name — **completed** (86d3d36p2)
- 2026-06-19 · Card elements displayed under the Appointment-Based Token section in Counter Settings are misaligned, causing an inconsistent UI appearance and affecting readability. — **review** (86d3dcr8w)
- 2026-06-19 · When configuring custom fields in the Service Registration Form, the system does not filter fields based on the selected service. As a result, custom fields configured for specific services are displayed across all services — **review** (86d3df9hk)
- 2026-06-19 · When adding a new Text Field in the Form module, the interface displays two scrollbars (nested scrolling). Users must scroll twice to access all form elements, resulting in a poor user experience. — **in progress** (86d3dfaf4)
- 2026-06-19 · Guest Count Automatically Reduced to Table Capacity Without Validation Message — **not started** (86d3dfez9)
- 2026-06-22 · The Delete Space confirmation popup is misaligned and does not appear correctly on the screen. — **not started** (86d3e4d9b)
