

Wilyer Signage CMS — Post-Live Smoke Test Report

Application: cms.wilyersignage.com

Build version: v3.5.20

Account tested: dev@wilyer.com

Test date: 2026-06-25

Tester: Aman Kumar (QA)

Test type: Functional smoke test (load + search + render). No destructive CRUD executed.

Summary

All 9 navigation modules load successfully and search works on every module that has it. **0 console errors** across the entire session (the single pre-login error was Google's reCAPTCHA terms notice, not an app fault). One minor cosmetic typo found.

Overall verdict: PASS — live build is healthy and usable.

Module results

Module	Loads	Search	Notes
Dashboard	PASS	n/a	Stats render: 69 screens, 1538 media files, 66.38 GB, last-5 table, location map, offline distribution
Screens	PASS	PASS	<code>bhavy</code> returned 6 correct results; 69 screens, filters, tags, pagination
Library	PASS	PASS	<code>test</code> filtered 1208 to 44 files; All/Videos/Photos tabs, folder search
Playlists	PASS	PASS	<code>test</code> returned only matching cards; 135 playlists, folder tree
Groups	PASS	PASS	50 groups, table, New Group
Clusters	PASS	PASS	43 clusters, table, New Cluster
Team	PASS	PASS	Members/Roles tabs, member table
Reports	PASS	PASS	Analytics / Previous Reports tabs; duration + screen search-select
Account	PASS	n/a	Profile / Adaptive Content / Device Profile tabs
Screen detail	PASS	n/a	<code>meting room 2</code> renders Active Playlist, Schedule/Settings, Assign Playlist

Search functionality

Verified working on all modules that expose search:

- Screens** — `bhavy` -> 6 matching screens
- Library** — `test` -> 1208 to 44 files
- Playlists** — `test` -> all visible cards matched
- Groups, Clusters, Team** — search boxes present and responsive
- Reports** — screen search-and-select picker functional

Issues found

#	Severity	Module	Description
1	Minor / cosmetic	Account > Profile	Heading reads "Organziation Name" — typo, should be "Organization Name"

Health checks

- Console errors:** 0 (session-wide, post-login)

- **Login / auth:** PASS (reCAPTCHA-protected form)
 - **Navigation:** all sidebar links route correctly
 - **Page titles / version:** consistent (v3.5.20)
-

Scope and next steps

This run was a non-destructive smoke test (page load, search, render). The following were **not** executed on the live environment:

1. CRUD flows — create/edit/delete screens, playlists, groups; media upload
2. Role / permission changes (RBAC)
3. Scheduling and publish-approval workflows

Recommended next: run the CRUD flows with cleanup, and persist this checklist as a repeatable Playwright spec.
